

Domestic Gas Appreciation for non operation staff

The course is designed for staff who manage or oversee work on gas engineers. You will gain a comprehensive understanding of all aspects of gas safety, giving you credibility and confidence when dealing with qualified gas operatives.

The course consists of elements:

- **Gas Safety Regulations**
- **Dealing with Emergency procedures, notices and labels**
- **Carbon Monoxide/combustion**
- **Flues and Ventilation**
- **Appliances, Meters, Pipework and testing**

The course is both classroom and practical followed by written assessment.

Course duration: 2 days

Start times: 9am - 4pm

Refreshments and lunch provided

NB: The practical session is optional, candidates not wishing to participate may observe.

Upon completion of the course a attendance certificate will be issued.

Please contact us if your specific requirements are not met within the course outline.
